Education

Major in Software Engineering

9-2021 - 12-2025

FPT University

GPA: 7.1/10

Technical Skills

- Front-end: ReactJS (Hooks, Context API), JavaScript (ES6+), HTML5, CSS3, SASS, Bootstrap, Ant Design, Material UI.

- Back-end: Node.js (Express), Java (Servlet, JSP).

- Database: MS SQL Server, MongoDB (Mongoose).

- Tools & Platforms: Git, Docker, Postman, Figma, VS Code, NetBeans.

- Fundamental Knowledge: OOP, MVC, RESTful API, Unit Testing, Integration Testing, System Testing, Performance Testing, Agile/Scrum.

About Me

Graduating with a degree in Software Engineering from FPT University, I have accumulated a solid foundation through practical projects using ReactJS and Node.js. With experience in teamwork and a deep understanding of the Software Development Life Cycle (SDLC), I aim to apply my knowledge to real-world projects while continuously learning to contribute value and become a professional Front-end Developer.

Work Experience

Front-end Developer Intern   **09/2024 - 08/2025**

FPT Software

- **Led a team of 3 to build the "Conduit" project as Team Leader:** Developed a real-world social platform using **React** and **Node.js**, featuring content creation, direct messaging, and real-time user interaction.
- **UI Design & Development Management:** Spearheaded the user interface design and oversaw the development lifecycle to ensure high-quality code and performance.
- **Project Delivery:** Successfully completed the internship by delivering a fully functional product demo to the stakeholders.

Front-end Developer   **11/2025 - Now**

NEMARK DIGITAL SOLUTIONS MEDIA COMPANY LIMITED

- **Develop Client & Internal Software:** Build and maintain responsive front-end interfaces for both external client projects and internal company tools, ensuring high performance and user experience.
- **Project Execution:** Collaborate with the team to deliver scalable web solutions tailored to specific client requirements and business deadlines.
- **Internal System Optimization:** Develop features for internal software to streamline company operations and improve workflow efficiency.

Projects

Capstone Project   **08/2025 - 12/2025**

LUMINA - TOEIC PRACTICE SYSTEM

Role: Full Stack Developer (Team of 5)

Technologies: Angular 18, ASP.NET Core API, SQL Server

Description: A comprehensive TOEIC testing platform featuring AI-powered grading for Speaking and Writing skills.

Key Responsibilities:

- **Full Stack Development:** Built a comprehensive web platform using **Angular 18** and **ASP.NET Core**, facilitating the practice and assessment of TOEIC skills (Listening, Reading, Speaking, Writing).

- Team Management & Leadership: Experienced as a Leader in multiple major projects.

- Problem Solving: Ability to self research and resolve technical issues.

- Communication: Strong communication skills with the ability to write technical documentation (BA).

- **User Engagement System:** Developed interactive features and gamification elements (rankings, seasonal challenges) to motivate users and enhance the learning experience.
- **Performance Analytics:** Implemented reporting modules that analyze test results, allowing users to visualize their progress and identify strengths/weaknesses across all skills.
- **Database Design:** Optimized **SQL Server** database architecture to manage large volumes of exam content, user profiles, and practice history efficiently.

Company Project   **12/2025 - 01/2026**

ERP - Enterprise Resource Planning

Role: Full-stack Developer

Technologies: PHP, MySQL (phpMyAdmin)

Description:

A comprehensive ERP web application for managing overall business operations, including human resources, payroll, and employee attendance.

Key Responsibilities:

- **Codebase Enhancement & Maintenance:**
- Analyzed, modified, and extended an existing ERP system to improve functionality, fix bugs, and adapt features to new requirements.
- **Human Resource Management:**
- Implemented and enhanced HR modules for managing employee information, roles, and employment status.
- **Payroll Management:**
- Developed payroll features to calculate salaries based on attendance records and predefined business rules, storing and managing data via MySQL.
- **Attendance Tracking:**
- Built attendance management functionality including check-in/check-out tracking and working-hour summaries.
- **Database Management:**
- Designed and maintained MySQL databases using phpMyAdmin, including table relationships, queries, and data validation.
- **Full-stack Development:**
- Handled both front-end and back-end development using PHP, HTML, CSS, and JavaScript within a XAMPP environment.
